1 QUICK SETUP

This guide describes the quick installation procedure of the Novalnet payment module with your system and how to start accepting payments worldwide. For this integration, a Novalnet merchant account is needed to accept Novalnet payments, so please make sure that you have received your merchant account details from our sales team. If not, drop a mail to sales@novalnet.de

This Novalnet payment module version (1.0.0) supports the following versions of Dolibarr system:

To get started:

1. Log in to the [Novalnet Admin Portal](#) with your merchant account details (user credentials).
2. Log in to your Dolibarr system.
3. Make sure that you have extracted the payment module package from the zip file you have received.

1.1 Module Installation

1.1.1 Module Installation via Package

To install the Novalnet Payment Module, please go to your dolibarr admin panel and follow the below steps,

Step 1: Navigate to **Setup** → **Modules/Applications** in your admin panel as shown below.

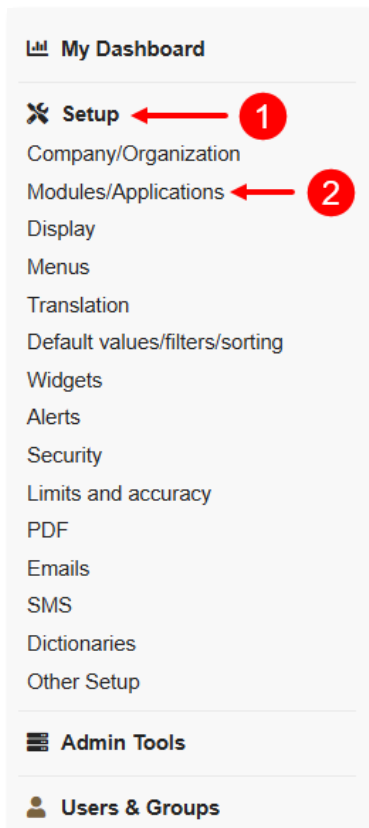

Figure 1

Step 2: Click **Choose File** and choose the **module_novalnet-1.0.0** file included in the Novalnet dolibarr module package and click **Open** as shown below

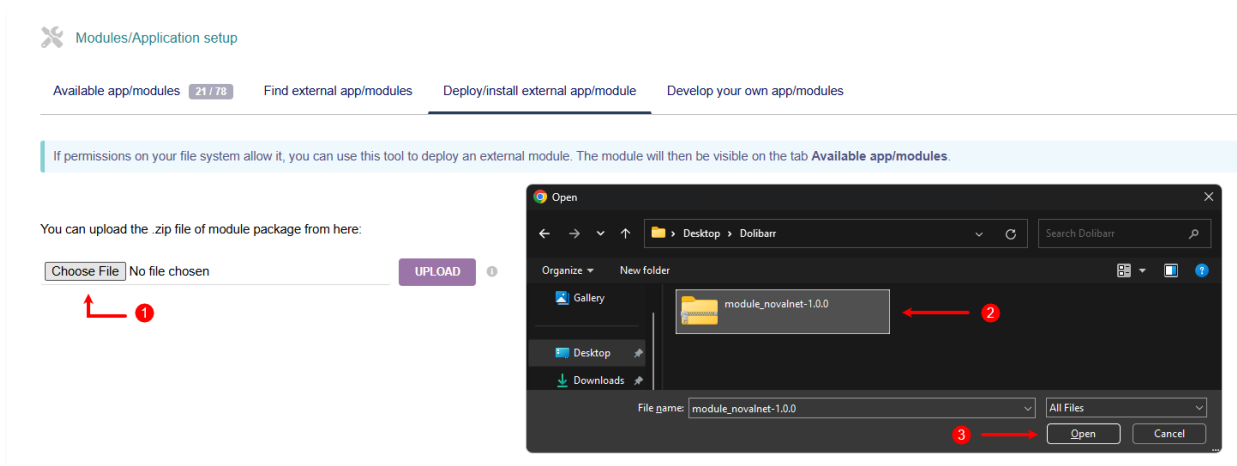

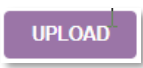

Figure 2

Then click  to upload the Novalnet payment module.

Step 3: Once uploaded, the **Novalnet Payments** module will be shown in the **Available app/modules** under **tab** as shown below.

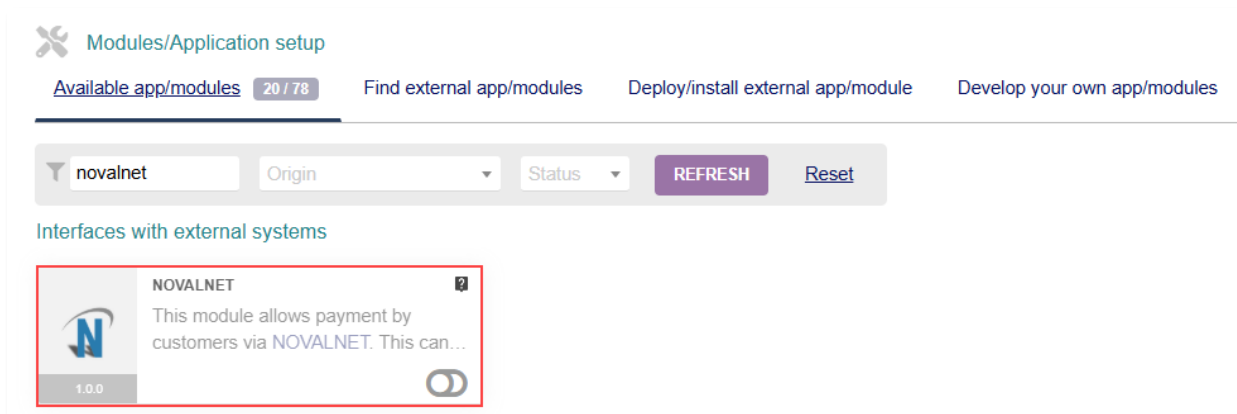

Figure 3

Click  to activate the **NOVALNET**.

1.2 Global Configuration in the Dolibarr system

The main configuration occurs in your dolibarr system and the [Novalnet Admin Portal](#).

In your dolibarr admin panel navigate to **Setup → Modules/Applications → Available app/modules**.

Click  as shown below

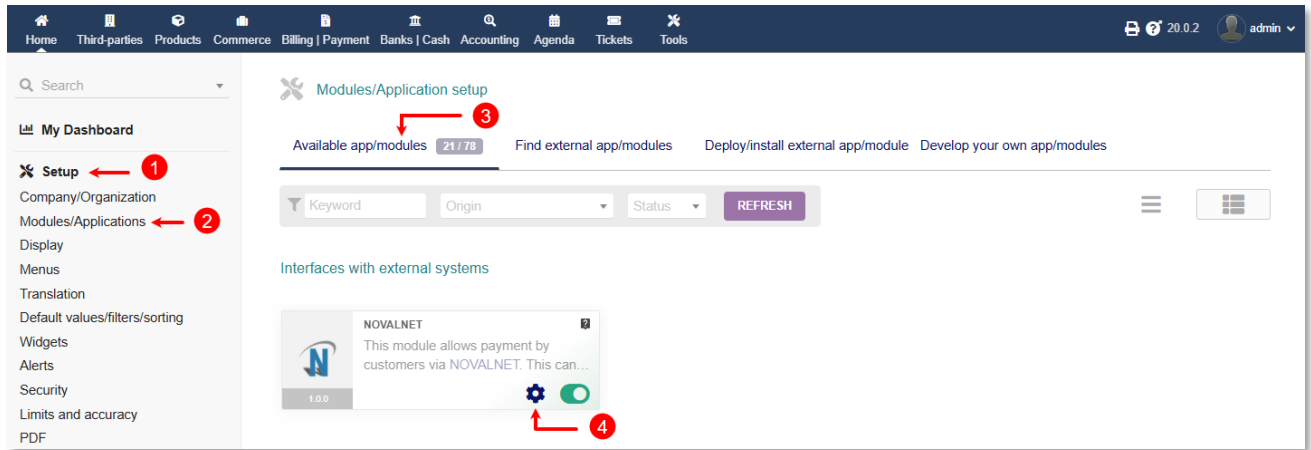

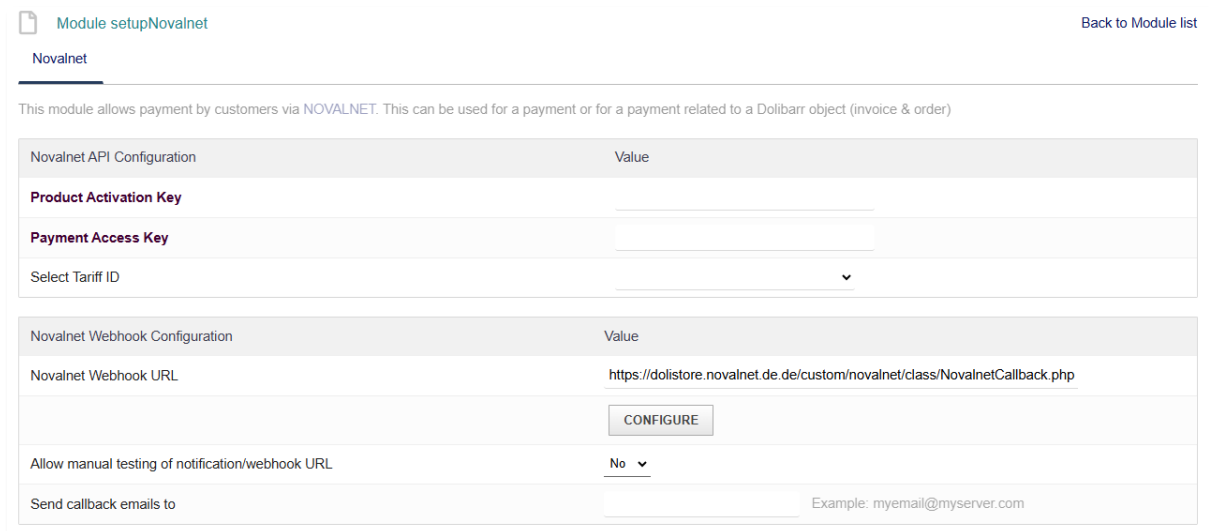

Figure 4

Next, you will be forwarded to the Global Configuration page to enter the following keys in Novalnet API Configuration:

- 🔑 **Product Activation Key** - a unique token for merchant authentication and payment processing.
- 🔑 **Payment Access Key** - a secret key assigned to each merchant that encrypts the data to avoid user manipulation and fraud.
- 🔑 **Tariff ID** - a unique identifier created based on the tariff type at Novalnet.

Module setupNovalnet Back to Module list

Novalnet

This module allows payment by customers via NOVALNET. This can be used for a payment or for a payment related to a Dolibarr object (invoice & order)

Novalnet API Configuration	Value
Product Activation Key	
Payment Access Key	
Select Tariff ID	

Novalnet Webhook Configuration	Value
Novalnet Webhook URL	https://dolistore.novalnet.de/de/custom/novalnet/class/NovalnetCallback.php
	CONFIGURE
Allow manual testing of notification/webhook URL	No
Send callback emails to	Example: myemail@myserver.com

Figure 5

To get your **Product activation key** and **Payment access key**, go to the [Novalnet Admin Portal](#), navigate to the **Projects** menu, and choose your project as shown below.

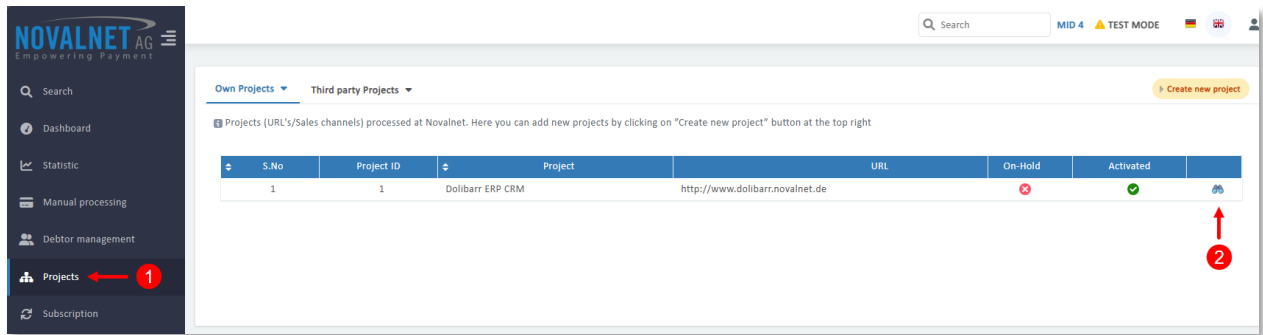

Figure 6

Click **API credentials**, and copy the **API Signature (Product activation key)** and **Payment access key**.

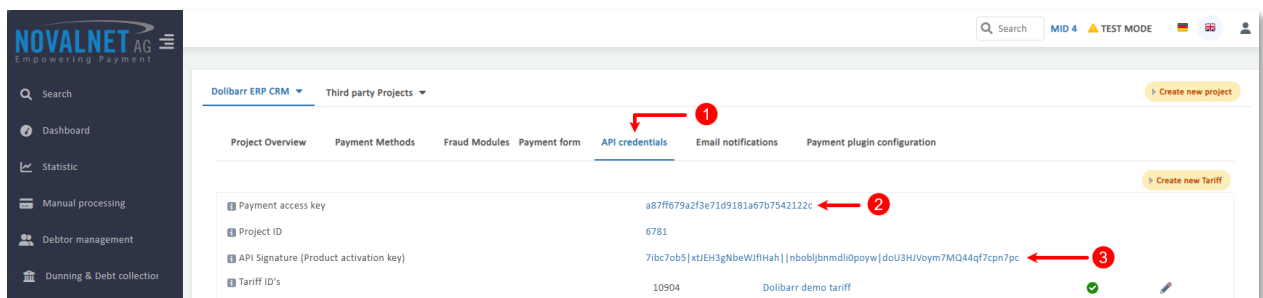

Figure 7

Paste the **Product Activation** and **Payment Access** keys in the respective fields in your shop admin panel. Next, choose the **Tariff ID** from the **Select Tariff ID** drop-down menu you have created at the [Novalnet Admin Portal](#).

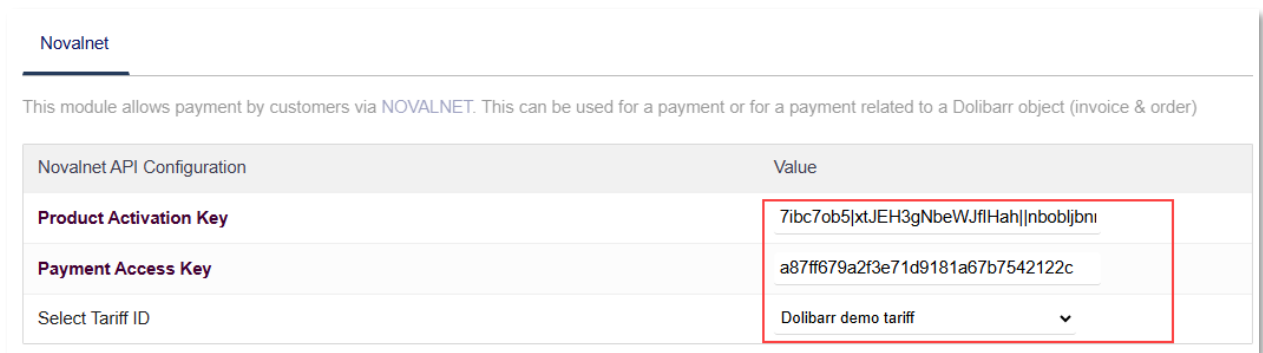

Figure 8

Then click **MODIFY** to update the changes.

1.2.1 Notification/Webhook Configuration in the Novalnet Admin Portal

In the **Novalnet Webhook Configuration**, you will find your **Notification / Webhook URL**, as shown below.

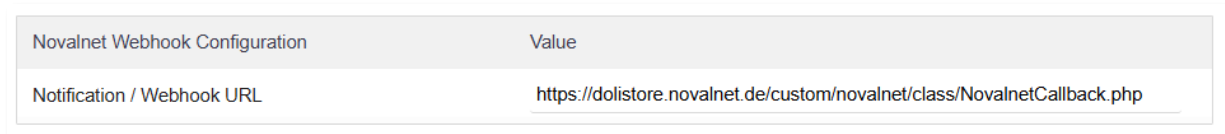

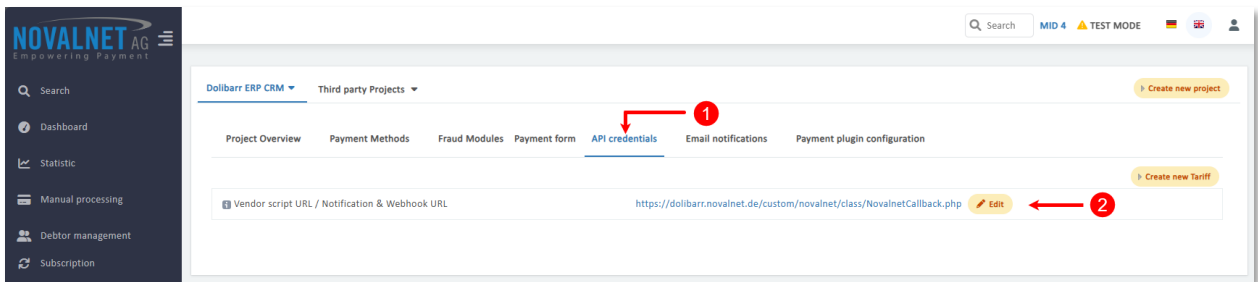

Figure 9

Click **CONFIGURE** to set up your **Notification / Webhook URL** in the [Novalnet Admin Portal](#).

Novalnet Webhook Configuration	Value
Notification / Webhook URL	https://dolistore.novalnet.de/custom/novalnet/class/NovalnetCallback.php
CONFIGURE	

Figure 10

After successful configuration, your shop **Notification / Webhook URL** will be linked with your Novalnet Merchant account, which can be seen under the **Vendor script URL/ Notification & Webhook URL** field of your project as shown below.

The screenshot shows the Novalnet Admin Portal interface. On the left is a sidebar with navigation links: Search, Dashboard, Statistic, Manual processing, Debtor management, and Subscription. The main content area shows a list of projects under 'Dolibarr ERP CRM' and 'Third party Projects'. A red arrow labeled '1' points to the 'API credentials' tab. Below this, a table lists the 'Vendor script URL / Notification & Webhook URL' for a project, with the value 'https://dolibarr.novalnet.de/custom/novalnet/class/NovalnetCallback.php'. A red arrow labeled '2' points to the 'Edit' button next to this URL.

Figure 11

In your system, you can also manually test the Webhook URL manually and send notification emails to the specific email address mentioned here.

Notification / Webhook URL Setup	Value
Novalnet Webhook URL	https://dolibarr.novalnet.de/custom/novalnet/class/NovalnetCallback.php
CONFIGURE	
Allow manual testing of notification/webhook URL	No ☐
Send callback emails to	Example: myemail@myserver.com

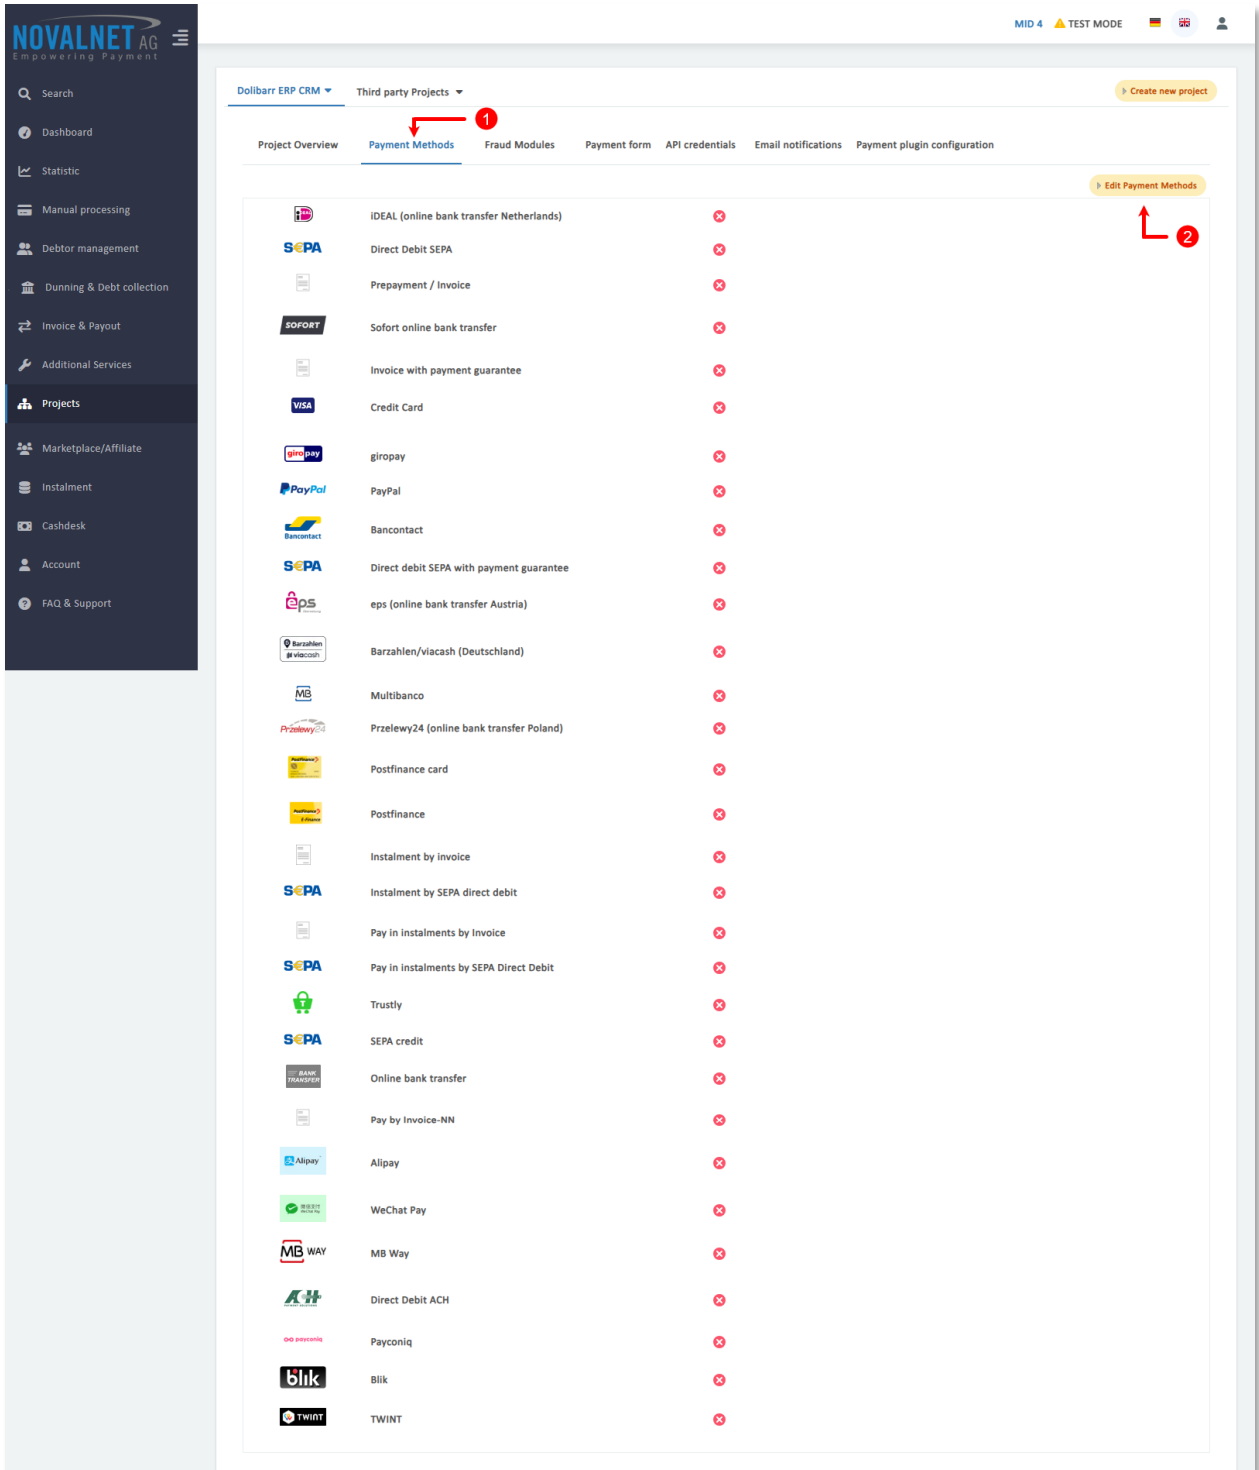

Figure 12

- Notification / Webhook URL** - Required to keep the merchant's database/system updated and synchronized with Novalnet (for example, up-to-date transaction status delivery).
- Allow manual testing of the Notification / Webhook URL** - Enable this to manually test the Novalnet Notification / Webhook URL. Disable this before setting your shop system live, to block unauthorized API calls from external parties.
- Send e-mail to** - Every execution will be sent as a message to the e-mail address defined in this field.

1.3 Payment Activation in the Novalnet Admin Portal

All the Novalnet-supported payment methods can be viewed here: www.novalnet.com/payment. If you have any questions related to the payment methods or have additional payment method requests, please contact sales@novалnet.de

To activate the [preferred payment methods](#) for your website, navigate to [Novalnet Admin Portal](#) → **Projects** → choose your project → **Payment Methods** → click **Edit Payment Methods** in the top right corner as shown below.

The screenshot displays the Novalnet Admin Portal interface. On the left is a sidebar with various navigation options. The main area shows the 'Payment Methods' section for a selected project. A table lists various payment methods, each with a logo, name, and a status indicator (a red 'x'). A red arrow labeled '1' points to the 'Payment Methods' tab in the top navigation bar. Another red arrow labeled '2' points to the 'Edit Payment Methods' button in the top right corner of the main content area.

Payment Method Logo	Payment Method Name	Status
IDEAL	IDEAL (online bank transfer Netherlands)	x
SEPA	Direct Debit SEPA	x
	Prepayment / Invoice	x
SOFORT	Sofort online bank transfer	x
	Invoice with payment guarantee	x
VISA	Credit Card	x

Figure 13

Next, select the preferred payment methods and click **Update** to activate them, as shown below.

The screenshot shows the 'Payment Methods' configuration page in the NOVALNET AG interface. The page is titled 'Dolibarr ERP CRM' and 'Third party Projects'. It features a sidebar with navigation options like Dashboard, Statistics, Manual processing, Debtor management, Dunning & Debt collection, Invoice & Payout, Additional Services, Subscription, Marketplace/Affiliate, Installment, Cashdesk, and Account.

The main content area displays a table of payment methods with checkboxes for selection. The methods listed include:

- IDEAL (online bank transfer Netherlands)
- Direct Debit SEPA
- Prepayment / Invoice
- Sofort online bank transfer
- Invoice with payment guarantee
- Credit Card
- giropay
- PayPal
- Bancontact
- Direct debit SEPA with payment guarantee
- eps (online bank transfer Austria)
- Barzahlen/viacash (Deutschland)
- Multibanco
- Przelewy24 (online bank transfer Poland)
- Postfinance card
- Postfinance
- Instalment by invoice
- Instalment by SEPA direct debit
- Pay in instalments by Invoice
- Pay in instalments by SEPA Direct Debit
- Trustly
- SEPA credit
- Online bank transfer
- Alipay
- WeChat Pay
- MB Way
- Direct Debit ACH
- Payconiq
- Blik
- KakaoPay
- Naver Pay
- TWINT

All checkboxes are currently checked. A red box highlights the 'Update' button at the bottom left of the list.

Figure 14

1.4 Payment Configuration in the Novalnet Admin Portal

For additional payment configuration settings for each payment method, navigate to [Novalnet Admin Portal](#) → **Projects** → {choose your project} → **Payment module configuration** on the right. Then, choose the required payment methods, configure the additional payment settings, and save the changes made.

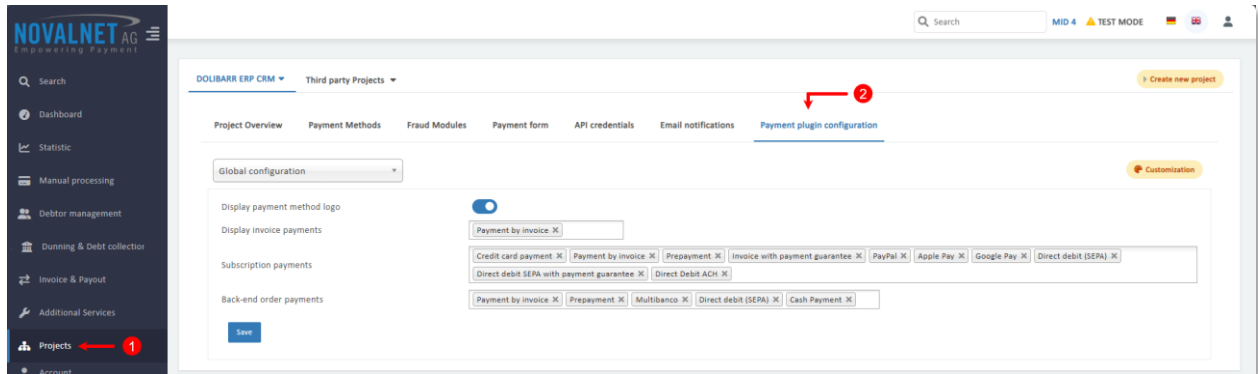

Figure 15

1.4.1 Display payment method logo

By enabling this option, all payment logos will be displayed on the checkout page.

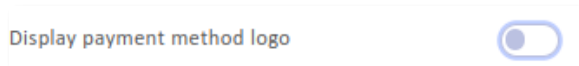

Figure 16

1.4.2 Display invoice payments

☛ This option is available only for **Payment by invoice** and **Prepayment** methods:

The payment name will be displayed on the checkout page by enabling these payments.

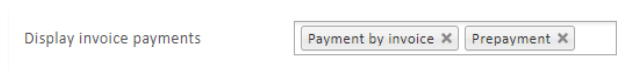

Figure 17

1.4.3 List of payments for the shop backend

☛ This option is available only for the following payment methods:

Payment by invoice, Prepayment, Multibanco, Direct Debit SEPA and Barzhalen/viacash methods:

Select the desired payment methods to enable order creation from the shop admin panel.

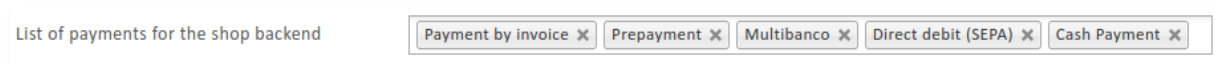

Figure 18

Refer to Chapter [3 ADDITIONAL CONFIGURATION](#), for more payment configurations.

☛ If you have any recommendations or suggestions for improvement, kindly share your thoughts on further developing our payment module at technic@novalnet.de or call us at +49 89 9230683-19.

2 TESTING AND GOING LIVE

Execute test transactions by navigating to [Novalnet Admin Portal](#) → **Projects** → {choose your project} → **Payment module configuration**. Select the preferred payment methods and enable the **Test mode**. In the test mode, the transaction amount will not be charged by Novalnet.

Figure 19

- ☛ Refer to the URL below for the Novalnet test payment data for testing
<https://developer.novalnet.com/testing/>

Execute orders in LIVE MODE

To proceed with **LIVE** orders, don't forget to disable the **Test Mode** for the preferred payment methods in the [Novalnet Admin Portal](#).

- ☛ If you have any recommendations or suggestions for improvement, kindly share your thoughts on further developing our payment module at technic@novalnet.de or call us at +49 89 9230683-19.
- ☛ Are you happy with our service and support? Please spend a few minutes to share your success [here](#).

3 ADDITIONAL CONFIGURATION

3.1 Additional configuration for all the payment methods

For additional payment configuration settings for each payment method, navigate to [Novalnet Admin Portal](#) → **Projects** → {choose your project} → **Payment module configuration** in the top right corner. Then, choose the payment methods and configure additional payment settings, as explained below.

Payment due date (in days)

Payment due date (in days) refers to the duration (number of days) given for the buyer to complete the payment. The payment process and duration may differ for each payment method.

- ☛ *This option is available only for the following payment methods:*

Direct Debit SEPA, Payment by Invoice, Prepayment and Barzahlen/viacash.

Figure 20

- ☛ For **Direct Debit SEPA**, enter the days after the payment is debited (between 2 and 14 days)
- ☛ For **Payment by Invoice**, enter the number of days the buyer gives to transfer the amount to Novalnet (must be greater than 7 days). If this field is blank, 14 days will be set by default.
- ☛ For **Prepayment**, enter the number of days the buyer gives to transfer the amount to Novalnet (must be greater than 7 days). If this field is blank, 14 days will be set by default.
- ☛ For **Barzahlen/viacash**, enter the number of days given to the buyer to pay at a nearby store. If this field is blank, 14 days will be set by default for slip expiry.

Payment Action (Debit immediately / Reserve funds for later/ Authorize with zero amount)

You can choose between two options - **Capture** and **Authorize**, which are both explained below,

☛ *This option is available only for the following payment methods:*

Credit Card, Direct Debit SEPA, Direct debit SEPA with payment guarantee, Instalment by SEPA direct debit, Payment by Invoice, Invoice with payment guarantee, Instalment by invoice, PayPal, Direct debit ACH

Capture - This is the default setting where payments are directly executed, and funds are automatically transferred from the buyer's account to the merchant account. This can be changed as per your business requirements.

Figure 21

☛ **Authorize** - Payment details are verified while the funds are reserved, which will be captured later.

Figure 22

☛ **Minimum transaction amount for authorization** - Transactions from this amount will be “authorized” (reserved) only and captured later. Leave the field blank to authorize all transactions.

Figure 23

Minimum Order Amount

☛ *This option is available for all payment methods.*

Enter the minimum value of goods for which the payment method will be displayed to the customer during checkout.

Figure 24

Maximum Order Amount

☛ *This option is available for all payment methods.*

Enter the maximum value of goods for which the payment method will be displayed to the customer during checkout.

Figure 25

Guarantee payment configuration

☛ *This option is available only for **Direct Debit SEPA with payment guarantee** and **Invoice with payment guarantee**.*

When the basic requirements are met, Novalnet offers you the option to process payments as guarantee payments. For more information about guaranteed payments and basic requirements, please visit:

<https://developer.novalnet.com/onlinepayments/aboutguarantee#basic-requirements>

Force Non-Guarantee payment

Enable this option to process payments as non-guarantee payments when the guarantee conditions are not met.

Figure 26

Allow B2B Customers

☛ This option is available only for **Direct Debit SEPA with payment guarantee, Invoice with payment guarantee, Instalment by Direct Debit SEPA, and Instalment by Invoice.**

Enabling this option will allow B2B buyers in your shop system.

Figure 27

Allowed currencies

☛ This option is available for all payment methods.

Select the currencies for which the payment methods can be processed.

Figure 28

Allowed countries

☛ This option is available for all payment methods.

Select the countries to which the payment method is applicable to be displayed on the checkout page.

Figure 29

Allowed countries (B2B)

☛ This only for the following payment option is available methods:

Direct debit SEPA with payment guarantee, Invoice with payment guarantee, Instalment by Direct Debit SEPA, and Instalment by invoice.

Select the countries where payment methods should be displayed on the checkout page for B2B categories.

Figure 30

Allowed countries (B2C)

☛ This option is available only for the following payment methods:

Direct debit SEPA with payment guarantee, Invoice with payment guarantee, Instalment by Direct Debit SEPA, and Instalment by invoice.

Select the countries where payment methods should be displayed on the checkout page for B2C categories.

Figure 31

Instalment payments configuration

☛ This option is available only for **Instalment by Direct Debit SEPA** and **Instalment by Invoice**.

When the basic requirements are met, Novalnet offers you the option to process payments as instalment payments. For more information about instalment payments and basic requirements, please visit:

<https://developer.novalnet.com/onlinepayments/aboutinstalment#basic-requirements>

Instalment cycles

Instalment cycle refers to the pre-defined period for partial payments, allowing buyers to pay their total order amount in parts. The intervals or cycles vary based on the shop admin configuration.

Define which instalment cycles you wish to offer in your shop (e.g., 2 cycles, 3 cycles, 4 cycles, 6 cycles, etc.) and click **Save**. The buyer can then choose among these instalment cycles if they wish to pay in instalments.

Figure 32

The pre-defined instalment details will be visible for the buyer under the chosen instalment payment method as shown below.

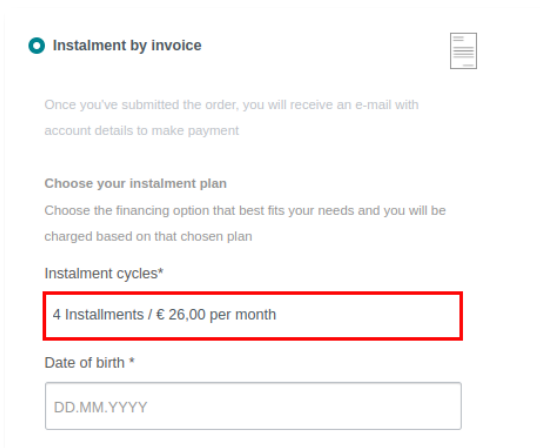

Figure 33

3.2 Additional Configuration for Credit/Debit Cards

Enforce 3D secure on payment outside EU

This option will authenticate all payments from cards issued outside the EU via 3DS 2.0 SCA.

Figure 34

3.3 Additional configuration for Apple Pay payment

Business Name

This text appears as PAY '**BUSINESS NAME**' on the Apple Pay modal payment sheet.

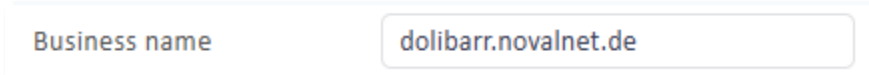

Figure 35
